There are many types of headache medicine. Which medicine should I take?

The cause of pain is a substance called *prostaglandins*. If you can't stand the pain, you have to take headache medicine.

Umm...

What happened, Ms. *Nonodate*? The next period is swimming class. Change into your swimsuit quickly.

Oh, Ms. *Odorigawa*. When I entered the changing room, I suddenly had a headache.

Qualifications we're having Part 15
Pharmaceutical Registered Salesperson

Why, even though you are a physical education teacher, are you familiar with pharmaceuticals?

Holders of this qualification can handle over-the-counter drugs with a relatively low risk of side effects.

I got the qualification of **"Pharmaceutical Registered Salesperson"** for the purpose of studying the structure of the human body.

You can take *ibuprofen* because you are over 15 years old. This medicine is suitable for you because it has less gastrointestinal effects.

CC1=CC=C(C=C1)C(=O)O

Why did you suddenly leave the changing room? Please zip up my back. ♡

Whew!

I don't think your headache will go away with *ibuprofen*.

She is that cause. She intends to attend swimming classes in a diving suit.

Continue to next qualification.

Yoo-hoo! Chinako!!

That's right! Btw, what causes your headache?

Well, I see a clerk with **"Registered Salesperson"** on his or her name tag at a pharmacy.
