Art 7: Heroine's crisis!  
It's always solved  
by an invention.

Produced by Shouhama High  
School **IP** Club (applying)

My! Ms. Neji,  
What kind of  
paper is it?

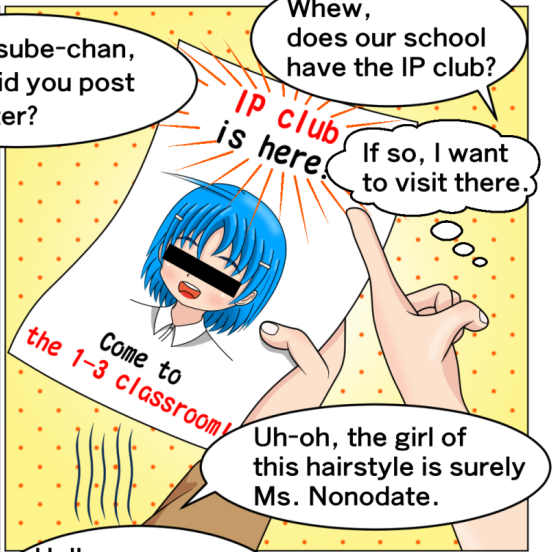

Oh! Ms. Maizono,  
You have some paper  
on your back.

Knock-knock  
I posted it on  
a prominent place.

Hey, Misube-chan,  
where did you post  
the poster?

So, I believe  
that someone will  
come here soon.  
I told you.

Whew,  
does our school  
have the IP club?

IP club  
is here!

If so, I want  
to visit there.

Uh-oh, the girl of  
this hairstyle is surely  
Ms. Nonodate.

Bowwow

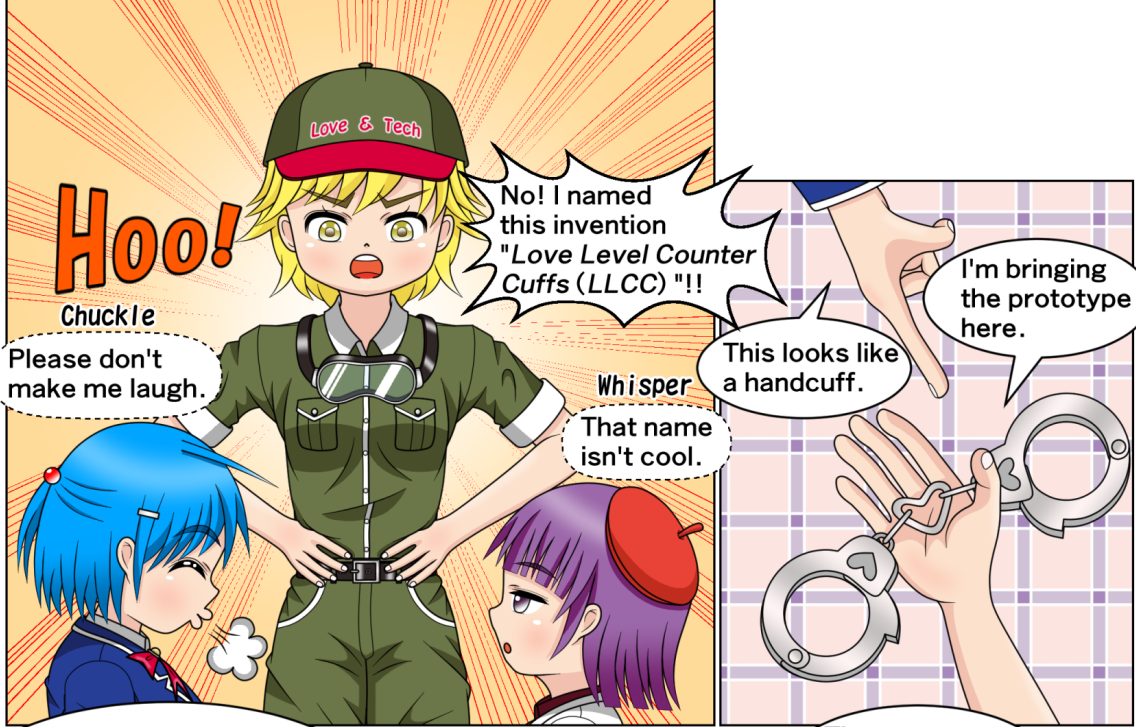

Can I consult you  
on "invention"?

Of course!  
Because an invention  
is my favorite.

Hello, are you  
the representative  
of the IP club,  
bouncing hair?

And, are you  
the member  
of this club  
too beret?

Ah, you're  
Tsukuru-chan of  
the handicraft club.

**Hoo!**

Chuckle

Please don't make me laugh.

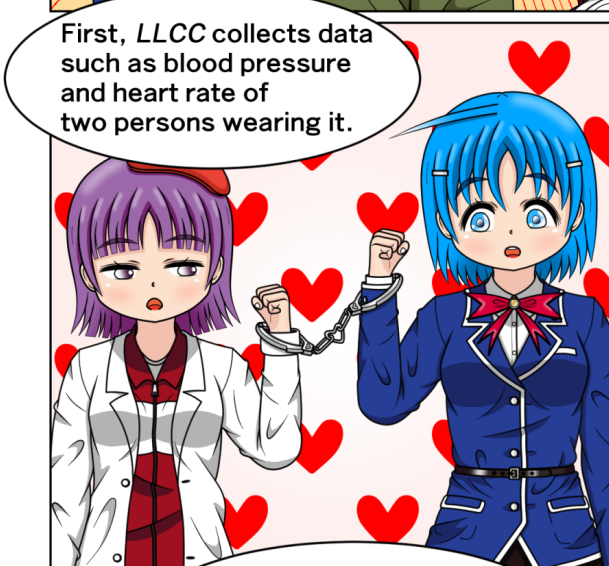

No! I named this invention "Love Level Counter Cuffs (LLCC)" !!

Whisper

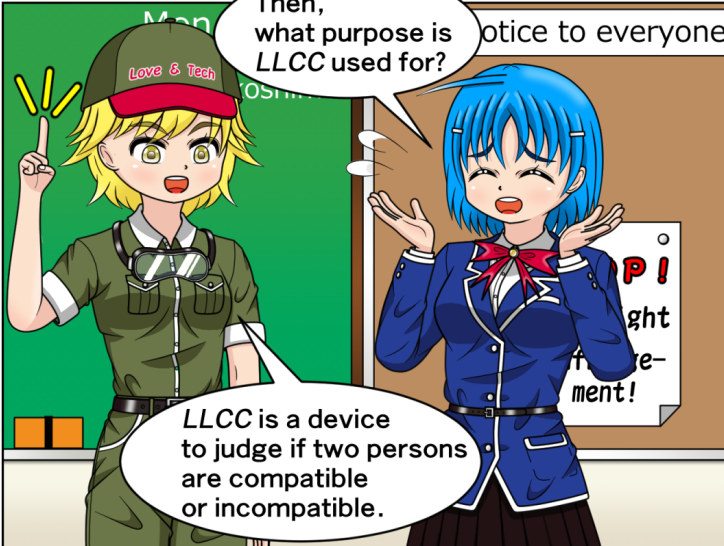

That name isn't cool.

This looks like a handcuff.

I'm bringing the prototype here.

First, LLCC collects data such as blood pressure and heart rate of two persons wearing it.

Then, what purpose is LLCC used for?

Notice to everyone

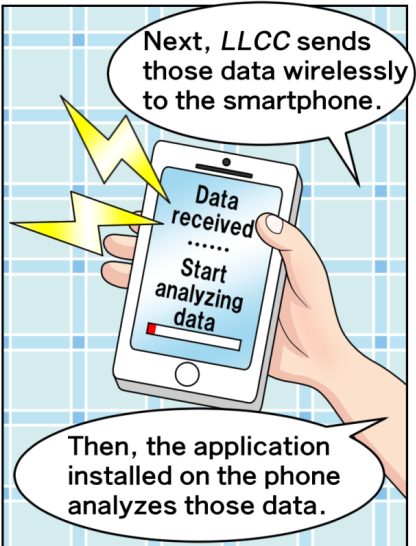

LLCC is a device to judge if two persons are compatible or incompatible.

Finally, the phone informs you of the level of affinity between the two persons as a "Love Level".

Your Love Level is X%.

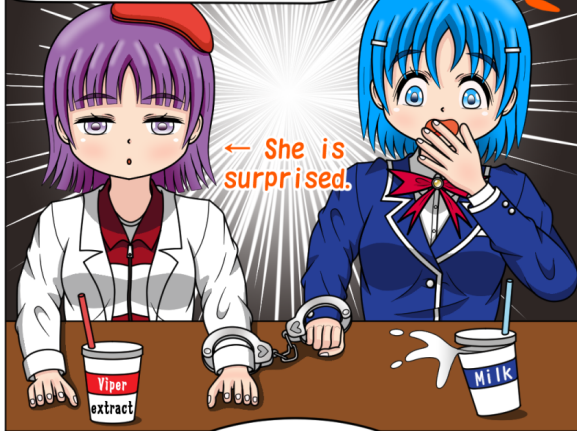

Well, under what situation is LLCC used?

Next, LLCC sends those data wirelessly to the smartphone.

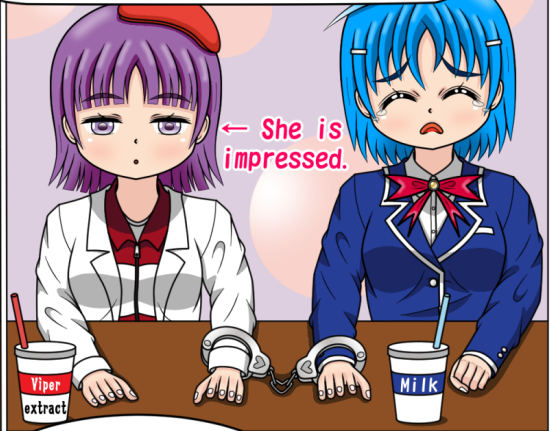

Then, the application installed on the phone analyzes those data.

If two persons watch a horror film, whether the levels at which they are surprised match?

← She is surprised.

For example, if two persons watch a romantic film, whether the levels at which they are impressed match?

← She is impressed.

Thus, I want you to help with the experiment on LLCC.

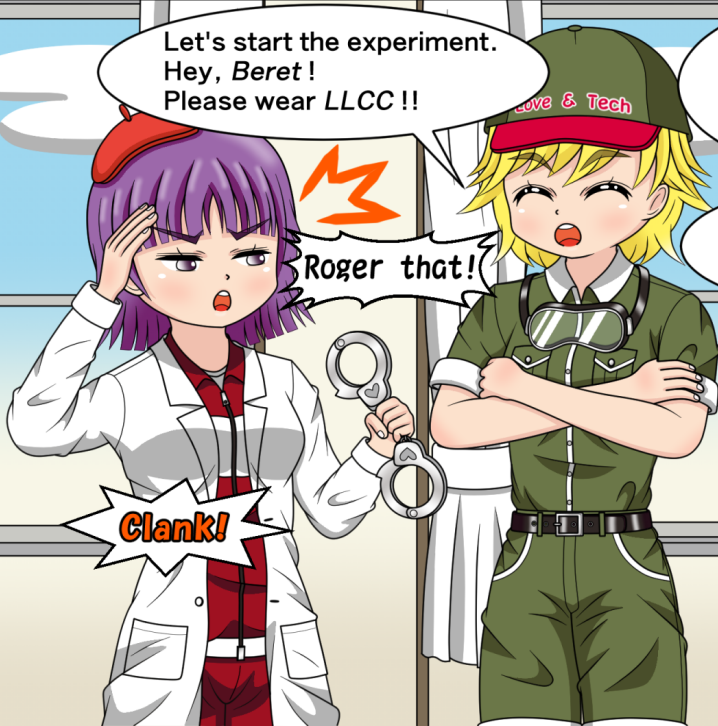

But, as the image shown above, I think our levels don't match at all.

If such a level matches, LLCC judges that Love Level is high.

Ah, I got it.

Let's start the experiment. Hey, Beret! Please wear LLCC !!

Roger that!

Clank!

Whether your levels match or not can't be known exactly unless it measures by LLCC.

And, if you help with the experiment, I'll join the IP club.

OK...

Mon. 4/16  
Day duty:  
Ms. Yokoshimo

... to eve

Uh-oh. Sorry.

That a heroine falls into crisis is a common story in Japanese animations.

So, I made a little mistake.

C'mon!

Misube-chan!?

You must connect me and you by LLCC!

Awww!

You really like animations, huh? Please listen to our talk!

When you attach LLCC to my both hands, It won't work properly!!

Oh well, beret.

Let's redo the experiment.

Your Love Level is 100%.

Good for you ♥

It's natural! Because LLCC is judging Love Level by the data of my both hands.

Hey!

Now analyzing data...

LLCC is starting data collection and analysis.
